

Tesamorelin

Lyophilized research peptide | Available sizes: 5 mg, 10 mg, 20 mg | Document ID: FR-TDS-TESAMORELIN-001

01 PRODUCT IDENTIFICATION

PRODUCT NAME	Tesamorelin
PRODUCT CLASS	Synthetic GHRH analog peptide
CATEGORY	GH Axis
AVAILABLE SIZES	5 mg, 10 mg, 20 mg
REFERENCE IDENTITY / SEQUENCE	YADAIFTNSYRKVLGQLSARKLLQDIMSRQQGESNQERGARARL
CAS REGISTRY NO.	218949-48-5 (tesamorelin reference)
PUBCHEM CID	16137828
MOLECULAR FORMULA	C221H366N72O67S
MOLECULAR WEIGHT	5136 g/mol
PHYSICAL FORM	Lyophilized research peptide
INTENDED USE	Laboratory and in-vitro research only. Not for human or veterinary diagnostic, therapeutic, prophylactic or dietary use.

02 ANALYTICAL AND QUALITY INFORMATION

PURITY	Lot-specific. Use the corresponding Fraction Research Certificate of Analysis; do not infer purity from this TDS.
PRIMARY IDENTITY	Identity should be lot-specific and supported by qualified supplier/manufacturer records and appropriate analytical confirmation.
HPLC	Lot-specific HPLC-UV result; see the applicable COA.
TRACEABILITY	Associate each vial lot with its corresponding analytical record and COA.

03 STORAGE AND HANDLING

- Store sealed and protected from moisture and unnecessary light exposure according to the qualified supplier/manufacturer specification.
- For lyophilized material, minimize repeated temperature cycling and prolonged exposure to ambient moisture.
- Do not infer shelf life, reconstitution conditions or solution stability from this TDS; use lot-specific validated data where applicable.
- Handle using standard laboratory chemical hygiene practices and appropriate personal protective equipment.

04 REFERENCE TECHNICAL DATA

CHEMICAL FORM	The exact supplied salt, counterion, hydration state, excipients and/or formulation control. Reconcile to supplier documentation before production publication.
SOLUBILITY / SOLUTION BEHAVIOR	Not standardized in this TDS. Validate conditions for the actual lot and intended laboratory method.
LOT-SPECIFIC PRECEDENCE	The lot-specific COA, supplier specification and SDS supersede generic reference information in this document.

05 COMPLIANCE AND LIMITATIONS

- This document is a technical reference for a research material and is not a drug label, prescribing document, dosing guide or clinical-use instruction.
- Do not use this TDS as a substitute for the lot-specific COA, qualified supplier specification or Safety Data Sheet.
- Exact chemical form, counterion, excipients and formulation details must be reconciled to the actual supplied material before public/production publication.
- Regulatory status and lawful marketing depend on exact product identity, intended use, claims and jurisdiction; obtain appropriate compliance review before publication.

06 SOURCE BASIS

PubChem CID 16137828 (Tesamorelin), including sequence, formula and molecular weight. Regulatory status and exact supplied form require independent review before publication. Reference data accessed August 18, 2026. Production values must be reconciled to the actual supplier/manufacturer records and lot-specific Fraction Research documentation.

RESEARCH USE ONLY. This material is intended exclusively for laboratory and in-vitro research by qualified personnel. Not for human or veterinary use.

DOCUMENT CONTROL Revision 001 | Lot-specific analytical documentation controls where values differ.
